salmanbondhon Bashundhara R/A , Dhaka , Bangladesh

PROFILE

Motivated Computer Science graduate seeking a Junior Software Engineer or SQA Engineer position. Skilled in C#, ASP.NET Core, Web API, Entity Framework Core, SQL Server, and RESTful API development. Familiar with manual testing, test case design, API testing (Postman), automation testing (Selenium), and bug reporting. Strong understanding of OOP, SOLID, SDLC, STLC, and software development practices. Eager to build reliable applications, ensure software quality, and grow professionally.

EXPERIENCE

.NET Developer Intern 05/2024 – 09/2024
Unicorn Software Solutions & Ltd. Remote

- Developed web applications using C#, ASP.NET Core, and Entity Framework Core.
- Developed and integrated RESTful APIs and CRUD operations.
- Worked with SQL Server for database management and queries.
- Debugged issues and implemented application improvements.
- Used Git/GitHub for version control and collaborated with the development team.

EDUCATION

B.Sc. in Computer Science and Engineering 2020 – 2025
AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH
Dean's List (Spring 2021–2022)
For academic excellence at AIUB
CGPA: 3.63/4.00

HSC 2018
BAF SHAHEEN COLLEGE Dhaka ,Tejgaon.
GPA: 4.58/5.00

Secondary School Certificate 2016
BANWARINAGAR C.B. PILOT HIGH SCHOOL
GPA: 5.00/5.00

SKILLS

Programming Languages
C#, JavaScript, Java, SQL

Web Technologies
HTML5, CSS3, Bootstrap, REST API

Backend Technologies
Node.js

Databases
SQL Server, MySQL

Software Testing
Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Test Case Design, Bug Reporting

Version Control & Project Management
Git, GitHub, Jira

.NET Technologies
ASP.NET Core, ASP.NET Core Web API, MVC, Entity Framework Core

Frontend Frameworks
Angular

Cloud & Deployment
Microsoft Azure

Software Engineering
OOP, SOLID, SDLC, Agile, Scrum, Design Patterns

API & Testing Tools
Swagger/OpenAPI, Postman, Selenium WebDriver

INTERESTS

Web Development | Machine Learning | Software Quality Assurance

PROJECTS

Hospital Management System
Angular 21, ASP.NET Core 8, C#, EF Core, SQL Server, Azure
GitHub | **Live Demo**
- Developed a **full-stack hospital management platform** with role-based workflows for Admin, Doctor, and Patient using Angular 21 and ASP.NET Core 8 Web API.
- Built core healthcare modules including appointments, patient/doctor management, prescriptions, medical records, payments, notifications, doctor leave management, and dashboards.
- Implemented JWT authentication and role-based authorization with protected APIs, route guards, HTTP interceptors, and role-specific functionality.
- Designed RESTful APIs and database operations using C#, Entity Framework Core, SQL Server/Azure SQL, including relationships, migrations, validation, and CRUD operations.
- Developed a responsive Angular frontend using Bootstrap, Angular Material, Reactive Forms, and REST API integration.
- Deployed the application using Azure App Service, Azure Static Web Apps, and Azure SQL, with production CORS and environment configuration.

Software Testing & Quality Assurance (Hospital Management System)
- Prepared test scenarios and detailed test cases for authentication, patient management, doctor management, appointments, prescriptions, payments, and role-based access control.
- Designed manual test cases covering functional, positive, negative, and input validation testing.
- Prepared structured bug reports documenting bug descriptions, reproduction steps, expected results, actual results, and supporting screenshots.
- Organized QA documentation using Excel spreadsheets to maintain test scenarios, test cases, and bug reports.

NZWalks API – ASP.NET Core Web API
- Built a RESTful API with ASP.NET Core and Entity Framework Core.
- Implemented Repository Pattern, AutoMapper, and full CRUD operations.
- Added JWT authentication and model validation.

Blood Management System with C#
- Developed a C# Blood Management System with modules for donors, receivers, and user authentication.
- Designed intuitive interfaces like Admin and User Panels for seamless user experience.

Online Exam Management System with Java
- Java-based app for quiz creation and participation.
- Features: Secure login, quiz management, real-time scoring.
- Data storage: Text files for questions, answers, and results.

CERTIFICATES

- Build an app with ASPNET Core and Angular from scratch
- The Complete 2025 Software Testing Bootcamp-Udemy

AWARDS

Dean's List (Spring 2021–2022)
For academic excellence at American International University-Bangladesh.

Board Scholarship
Awarded General Grade Scholarships in both the PSC (Class 5) and JSC (Class 8).
